TeleBill has an answer for telecommunication carriers who lose thousands of dollars every month by misapplying taxes to their monthly bills.

Work with BillSoft.

Overland Park, KS, March 1, 2010 — BillSoft, Inc., the market leader for transaction-based taxation, announced today that TeleBill, Inc, an outsourced billing services provider, has contracted with BillSoft to provide tax rating on Telebill's communications services in a real-time billing and taxing environment.

TeleBill's unique billing software has continued to evolve to handle the latest in VoIP and converged solutions while maintaining to provide support for legacy products. The TeleBill solution provides a high degree of flexibility at an affordable price, making it especially well-suited for small to mid-sized telecommunications carriers who often do not have the resources to fully maximize their revenues through billing or fully minimize their carrier costs. With TeleBill, companies can see significant improvement in both areas.

TeleBill chose to outsource its tax rating to BillSoft for improved accuracy and speed. "We were impressed with BillSoft's EZTax platform and its ability to tax all kinds of telecommunications services in real-time," said Paul Tucci, TeleBill's President and Founder. "And the remote-hosted EZTax ASP application was a perfect fit with our outsourced business model."

"It's a great partnership between two companies that deliver standout solutions," said Vicki Klein, BillSoft President. "By coming together, you can expect bigger and better things."

About TeleBill, Inc.
